DETAILED ACTION

REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance: The closest prior art of record, Berry et. al., U.S.P. No. 4,997,249 teaches (Figs.1-8) an optical fiber variable weight transversal filter comprising a plurality of connected optical fiber couplers 15,16 with a looped region between with an RF signal input source 11 with each of the couplers being weighted to have positive and negative weights and an optical output summing detector 17 to provide a filtered output. Neither Berry 249' or any of the references of record teaches or suggests the claimed delay line filter comprising the combination comprising: an optical splitter; an optical splitter; an optical loop having a first and second directional coupler wherein the first directional coupler is in communication with the optical splitter and the second directional coupler; a photodetector in communication with the first and second directional couplers and an impulse cancellation line coupled between the optical splitter and the photodetector. The impulse cancellation line is coupled between the optical splitter and the second photodiode. Neither Berry 249' or any of the references of record teaches or suggests a method for filtering an optical signal comprising the steps of circulating the optical signal through a first and second directional coupler, extracting a percentage of light from the optical signal each time the optical signal passes through each of the first and second directional couplers and thereby generating a series of positive and negative signals and canceling a first positive signal in the series of positive signals. These limitations

are recited in claims 1-29 and are considered to be patentable over the teachings of Berry 249' and all of the recited references of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled **"Comments on Statement of Reasons for Allowance."**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure Hunt et. al., U.S.P. No. 4,128,759 (Figs.1-4), Mc Donald, U.S.P. No. 5,376,786 (Figs.1-5), Hayes U.S. Patent Application Publication No. U.S.2004/0120642A1 (Note entire disclosure) and Burns, U.S.P. No. 4,976,518 (Figs.1-5).

All of the prior art documents submitted by applicant in the Information Disclosure Statement filed on July 26, 2004 been considered and made of record. Note the attached initialed copy of form PTO-1449.
